

Sea Eagle Class

Our year began with us travelling back in time to the Roman times! We started our topic by coming into school dressed like Romans and having a Roman feast in our classroom - tasting what were seen at the time as Roman delicacies! We also used role play to explore how people in Roman society were treated differently based on how much money they had.

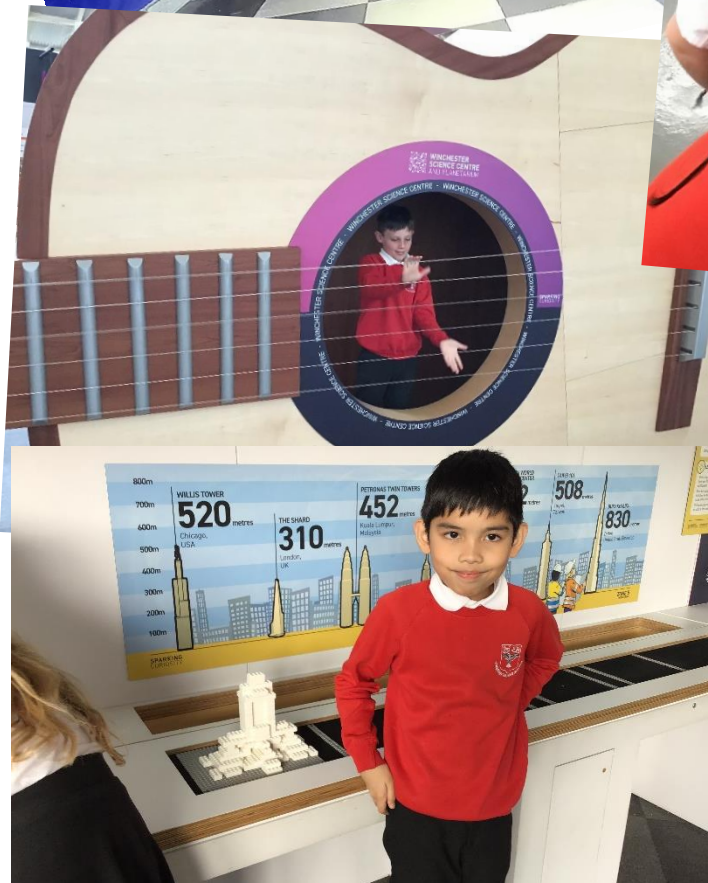

Later on during our topic, we went on a school trip to Fort Nelson, where we experienced what life was like for Roman Soldiers - we tried on their armour, used their weapons and even learned some commands and shield formations that were used by the Roman army!

Our next topic was 'Cracking Contraptions' and we explored how we could use all of our S.T.E.M skills to design, build and race electric cars.

We also visited Winchester Science Centre and had a great time investigating the hands-on exhibits and programming the Crumble Bots!

We really enjoyed performing Christmas Carols and showing off our skills in gymnastics!

In Spring, we learnt all about Dragons as part of our 'Dragonology' topic. We created clay dragon eyes, researched dragons and built nests for dragon eggs to inspire our writing.

In March, we went on our residential trip to Runways End, where we had an amazing few days exploring, climbing, canoeing and completing team building challenges!

In Spring, during our Science lessons, we learned about evolution and adaptation - we were given the task of designing a bird beak, capable of picking up seeds. This helped us to think about the ways in which different birds have adapted to consume different diets, depending on where they live and what they need to survive.

During the summer term, we learned all about The Second World War. We come to school dressed as evacuees. We were given a tour of our 'new home' then we were chosen by 'local villagers' and spent the day as evacuees doing jobs!

One afternoon, we walked down to the church to visit the WW2 war graves and we found a plaque in honour of the plane that crashed on the island during the war. As you can see, some of us were quite tired when we returned!

We held our own VE party in class, after decorating it with bunting, and we particularly enjoyed trying SPAM sandwiches! We even invited the sock monkeys that we made ourselves - thinking of the wartime motto 'make do and mend!'

Miss Reeves arranged a school trip to the D-Day Museum Southsea, where we learned all about D-Day and the soldiers who put their lives at risk to help win the war. We had a picnic and then looked at the war memorials on Southsea Common.

We have had the best time in Year 6!
