

New School Hall Extension

First they demolished the south facing wall of the old hall and the PE store. The children loved watching the machines at work. Then the cranes and big lorries started to arrive to put up the steel framework. The children are all very excited and

so are the staff. The project is being funded by WSCC and the works carried out by Buxtons Builders and project managed by Faithful and Gould. The estimated cost is £840,000. This will provide a much needed link corridor and a state of the art sports hall.

Thorney Island Community Primary School serves Thorney Island and the surrounding community. At present, both 16th and 12th Regiment Royal Artillery are based on Thorney Island but many children also come from the local community of both Southbourne and Emsworth. The school continues to be rated Good by Ofsted and has more than doubled in size over the past few years due to its popularity and unique location.
